Decimal Numbers - Rounding to the nearest hundredth / 2 decimal places. Use the number lines to round each decimal number to 2 decimal places. Example:
3.473 is between 3.47 and 3.48

This is the same as 3.470 and 3.480

If the number is less than 3.475 round down to 3.47

If the number is 3.475 or greater, round up to 3.48

Name: ............................. Date:
Decimal numbers - Rounding to the nearest whole number.
Use the number lines to round each number to the nearest whole number.
1)
5.249

5.249 rounded to 2 decimal places $=$
