

Make Your Own Sundial.

Thank you for downloading this resource.

You will find:

1 clock face.

A petal template.

You will also need:

A paper plate, glue and scissors.

A pencil or garden stick.

Coloured paper or card (if recreating petals)

Instructions:

- 1) Cut out the clock face and stick to the back of your paper plate.
- 2) Decorate the plate as you wish or feel free to use the petal template to make a flower.
- 3) Put a hole through the centre of your clock.
- 4) Put your sundial somewhere in full sun, no shadow.
- 5) Put your pencil or garden stick through the centre of your sundial.
- 6) Make sure the 12 is pointing north and the shadow of the pencil or stick should tell you the time!

If you are unsure of North and don't have a real compass, you may have a compass on your phone or tablet.
